

[DragonsteelBooks] 'Sort By' function from products page

+ Add

Description

When the user needs to sort products by price, popularity, etc

Test Scenario

Given the user needs to sort the products when they are browsing then they can sort the products list according to 'featured', 'best selling', 'alphabetically: a-z, or z-a', 'price: low to high, high to low' and 'price: low to high, high to low'.

Dependencies

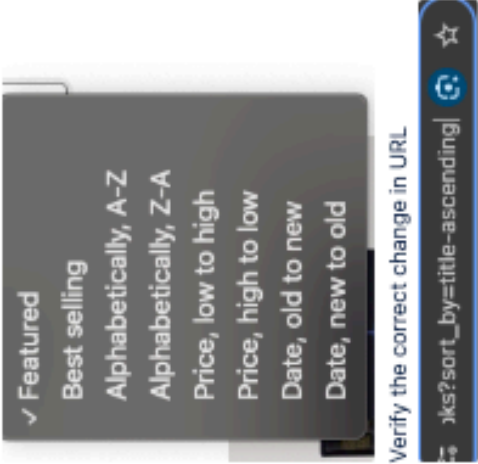

None

Preconditions

- URL: [All Products](#)

Test Steps

- on the all products page, click dropdown 'Sort by:'
- Click the first option

- Verify the correct change in URL

- Repeat steps 1 - 3 for each option

Expected Test Step Results

Each 'Sort by:' listed should have change in URL endpoint and change on the page.
