

[MTech] Wrong page loaded/not loaded for Software QA page

+ Add

Description

When using the search from the home page and typing in 'software qa', the search returns the correct class, but when you go to click on the class card it shows the incorrect url/endpoint and returns an error that the site cannot be reached.

Replication Steps

- 1. go to <https://mtec.edu>
- 2. click the search icon
- 3. type in 'software qa' into the search bar and press enter
- 4. click the Software QA class card below

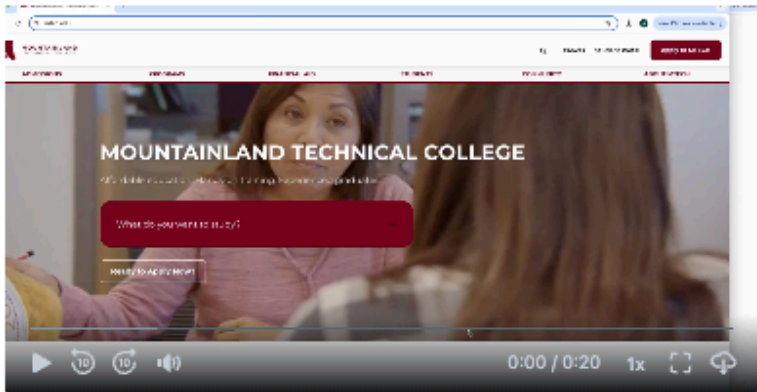

Expected Behavior

After clicking the software qa card it should take me to the site or url/endpoint that looks like this, 'mtec.edu/programs/software-quality-assurance/' .

Actual Behavior

After clicking the software qa card it goes to this url/endpoint, 'mtec.eduprograms/medical-billing/'.
