

[DragonsteelBooks] Cart doesn't update for checkout

+ Add

Description

When the user adds too many products to the cart and the pop up says they can't add anymore, and then add by the + symbol, can add to the cart, and the cart is updated, but they aren't able to checkout. If the user refreshes the page, even with the higher number, then they are able to checkout.

Replication Steps

1. Go to [Home | Dragonsteel Books](#)
2. Click the 'Catalog' page
3. Add any items to the cart
4. Click the cart checkout button at the top right-hand side
5. Move down to the bottom of the Cart menu and click the 'View Cart' button
6. Click in the quantity of the number for your item and type in a number over 100
7. Use the + button to add more
8. Click the 'Checkout' button

Expected Behavior

When adding items to the cart(even if too many and after displaying you can't add anymore, and not be able to add by the +), the cart should update and let the user checkout.

Actual Behavior

When adding to the cart, by inserting the numbers, if too many are added it creates a pop-up saying you can't add anymore, but it still lets you add with the +, and the cart is updated with the top icon and in the cart amount, but you are not able to checkout, it creates a pop-up saying the cart is not updated. If you do a refresh of the page, all the items stay and then you are able to checkout. (see video)
